

Are Stem Cells in your Future? 912-764-9187

The foregoing are testimonials of folks who have used Dr. Royal's Stem Cell protocol. This is the same protocol I use so it is now available close to home.

Stem Cells Heal Neck pain.

"In 1988, I was involved in a rear-end automobile collision. The injury to my neck caused three protruding discs from C3 to C7. Chiropractic treatments did

not help relieve my pain. Surgery was recommended but the risks included potential paralysis and the loss of my voice. I took an anti-inflammatory medication instead. After 27 years of taking the drug it began to damage my kidneys. After the stem cell treatment I became completely pain-free and stopped my pain medication(s). It was a miracle! [Pamela 68 y/o]

Stem Cells heal pain for Sjogren's disease

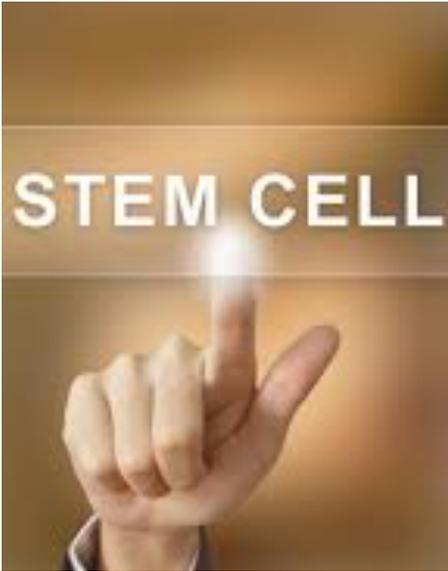

On July 24 a Sjogren's Syndrome patient was treated with Stem Cells. She was complaining of pain in her jaw from past root canal extractions due to infections (and from which we believe her autoimmune condition resulted). When followed up with the patient on Tuesday, August 23, she said the following:

“The pain in my jaw and ears are gone. My ears were so painful I couldn't touch them. Even my husband says, ‘You're like a new person.’”

As a result of this patient's dramatic improvement with one treatment, where medicines had failed to work, she has

asked to receive another Stem Cell treatment in October 2016.

Natural Stem Cells improve Rheumatoid Arthritis.

I have tried many different treatments including Amino Acid IVs, Chelation Therapy, Hormonal Therapy, Food Allergy, and Nutritional testing....After receiving Stem Cell treatments. I noticed an even bigger benefit and reduction in pain [for my Rheumatoid Arthritis]. Stem Cells are amazing for taking away pain!" [Marilyn 56 y/o]

Ya, in my case that good or better. Hope where there is little hope. Works where other treatments fail.

Stem Cells for COPD

I went to pulmonary rehabilitation and my oxygen (O₂ saturation) level started at 98% and it only went down to 97% during exertion and exercise whereas before when I would start pulmonary rehabilitation my oxygen (O₂ saturation) level was 94% and it would go down to 92%. I think the stem cell treatment has helped a lot! This improvement occurred one month after my initial treatment with stem cells.”
[Leo, 60 y/o]

Natural Stem Cells for lungs

I was diagnosed with COPD on February 25, 2016 and prescribed home oxygen. On May 25, 2016, I received a natural stem cell treatment. One month later, I was able to breathe much easier and am not nearly as short-winded as I was before the treatment. Now, I feel like I have a future!" [William, 75 y/o]

Natural Stem Cells Heal pain

With your stem cell treatment, supplements, and good eating I am not only out of pain but I am beginning to feel I can actually obtain my optimal health and body weight after 23 years of suffering." [Mary G]

Testimonial from a Stem Cell patient

My tumors are disappearing. The big one on my right arm is almost gone. The nerve pain has subsided and my arms, torso and spine, where the tumors have been. I'm feeling about 80% less constrained. My sores and dark spots on my arms, hands and face are just about gone. The two sores on my foot are almost gone. The

people who know us here on the island who have stopped by the gallery are commenting on how much better I look. And I'm feeling a 100% better. I feel like I can handle my day and be OK with whatever comes my way. Feeling my pain disappear so quickly is amazing and a true blessing."

If you or a loved one is dealing with a difficult health problem maybe a Natural Stem Cell consult is in order and maybe, just maybe, Natural Stem Cells are just the trick.

Call Megan at 912-764-9187.

Yours in the interest of a Brighter Day.

May God Bless,

Dale C. Madson, DMD, NMD, IBDM, Stem Cells.

Dr. Madson has two doctorates a DMD in Medical Dentistry and an NMD in Naturopathic Medicine and he is adjunctive faculty at The Dental College of Georgia in the General Practice Residency where he teaches and lectures and has done so for a decade.
